

ITRIXX® WIRELESS EQUIPMENT HOUR METER

A Wireless Equipment Runtime Meter for Industrial Equipment Preventative Maintenance

iTrixx is an IoTmeter which was developed on Linortek's secure TCP/IP product platform with MQTT protocol, easy to setup, flexible data collection, WiFi/Ethernet connectivity. It can be used to track industrial equipment runtime data for preventative maintenance, improving operational efficiency and uptime with no monthly subscription fees.

- ◇ Monitor Equipment Usage
- ◇ Monitor Machine Uptime/Downtime
- ◇ Operation Counter
- ◇ Monitor Vibration
- ◇ Monitor operator behavior (impacts)
- ◇ And More...

 **Cost Effective** — All-in-one system with built-in web server, no software to purchase, no 3rd party server & no monthly fees.

 **Data Security** — iTrixx is NOT a cloud based system. All data is stored locally at your facility giving you full control of collected records.

 **Easy to Deploy** — Setup in minutes, automatically transfer data to your database over the network
